

Directions for Descending Terradets Gorge Walls

From Amanita wall:

- Amanita route: Abseiling Amanita route. Pay attention to other teams climbing the route.

From Bagasses wall:

- Falsa Feixa route: first by safety cables to right of the wall and then walking. Be careful crossing the rail and end climbing down with fixed rope.
- Feixa route: walking and ending down to the road with fixed rope.
- From routes ending in the summit: first walking to the right of the wall. Then climbing down some easy short walls. Next, walking down a little bit more to the right of the wall. You'll find an abseil station, made with bolts and chain. If you find any kind of sling you are not in the correct station. 55m long rappel and the last part is hanging. Later walk down to the road. And finally climb down to the road with fixed rope.

From Regina wall:

2 rappels to the far right wall: the first abseil (30m long), do it with one single string, because is easy to hook the knot in case the ropes are tied. The second one is 50m (hanging). Then you walk to reach the road. Pay attention it maybe slippery.
